Dr. Kevin Buyck, Chief of Dentistry at New Dimensions in Health Care in Amsterdam, demonstrates an Aribex NOMAD hand-held x-ray unit funded through a Community Impact Grant from the Community Foundation of the Greater Capital District. The portable unit will allow clinicians to safely stay in the operatory and assist patients in maintaining their position as the x-ray is taken. A program of Liberty ARC, New Dimensions in Health Care was established in 1996 to provide dental and medical care for individuals with developmental disabilities and others in need in the community.
